

LiPo Battery Charging Guide

1. Connect the charger to the power socket. Connect the balancer cable and then the charger cable. Lastly, pack the LiPo into the **Safe Bag**!

2. Press **Enter** to select program.

3. Navigate to LiPo BALANCE Program using the + and - buttons and confirm with **Enter**.

4. Set the current to **5.0A** using the + and - buttons and confirm with **Enter**.

5. Set the voltage to **7.4V (2S)** using the + and - buttons and confirm with **Enter**.

6. Press and hold **Enter** to launch the program.

7. Confirm the setup and start the program with **Enter**.

8. The charging process is running.

9. When the LiPo battery is fully charged, a loud beep will sound.
